

KIRNAVI BHAVSAR

Ahmedabad, Gujarat | +91 9978272234 | kirnavibhavsar7@gmail.com |
GitHub: KirnaviB | LinkedIn: [linkedin.com/in/kirnavi-bhavsar](https://www.linkedin.com/in/kirnavi-bhavsar)

**AI Developer | Conversational AI | Intelligent Systems Developer | Python Developer |
AI Security**

Professional Summary

Motivated AI/ML and Full-Stack Developer with hands-on experience in Generative AI, Machine Learning, LLM-powered applications, RAG systems, and intelligent automation. Skilled in Python, Flask, React, SQL, and modern development frameworks, with a proven ability to design and build scalable AI-driven applications from concept to deployment. Eager to contribute technical expertise, creativity, and a continuous learning mindset to innovative technology teams.

Education

B.Tech in Information Technology — Indus University, Ahmedabad
2022–2026 | **CGPA: 9.6/10**

Experience

VaultAI — AI Software Engineer Intern

Jan 2026 – Apr 2026

- Contributed to development of ChatGPT-like conversational AI application.
- Worked on LLM-powered chatbot workflows and intelligent response systems.
- Developed and enhanced Excel Add-in integrations for intelligent automation.
- Assisted in AI application feature development and workflow optimization.

Masterly Solutions Pvt. Ltd. — CyberSecurity Intern

Jul 2025 – Oct 2025

- Performed monitoring, analysis, and technical investigation in simulated enterprise environments.
- Worked on behavioral analysis and workflow automation use cases.

Projects

Financial Intelligence Platform — AI-Powered Financial Analytics Platform

- Built enterprise-grade Flask + React financial analytics platform.
- Implemented anomaly detection, forecasting, and intelligent financial insights.
- Developed RAG-based conversational financial assistant using embeddings, FAISS, vector retrieval, and LLM APIs.
- Added CSV/XLSX/PDF ingestion, JWT authentication, RBAC, audit logging, and analytics dashboards.

AI Recruitment Automation System

- Built intelligent recruitment workflow automation for candidate screening and evaluation.
- Integrated LLM-based resume analysis and decision support workflows.
- Automated hiring process tasks to improve operational efficiency.

Soccer Player Market Value Prediction

- Built predictive machine learning model for estimating soccer player market value using performance-based features.
- Performed preprocessing, feature engineering, model training, and evaluation.

SSH Honeypot Monitoring System

- Built SSH honeypot for attacker behavior monitoring and automated defensive response.
- Implemented logging, behavioral tracking, and incident visibility workflows.

Technical Skills

AI & Intelligent Systems: Machine Learning, Deep Learning, Generative AI, LLM Applications, Conversational AI, RAG, Prompt Engineering, NLP, Anomaly Detection, Predictive Analytics, Forecasting, Model Evaluation, Feature Engineering, Data Preprocessing

Languages: Python, JavaScript, SQL

Libraries & Frameworks: TensorFlow, Keras, Hugging Face, scikit-learn, pandas, NumPy, Flask, React

AI Tools: FAISS, Vector Databases, Embeddings, LLM APIs

Backend & APIs: REST APIs, JWT Authentication, Swagger

Databases: SQLite, JSON, SQL

Developer Tools: Git, GitHub, Postman, VS Code

Certifications & Leadership

- Cybersecurity Analyst Job Simulation — Forage
- Deloitte Technology Job Simulation — Forage
- Ethical Hacking Training — Internshala
- Content Head, CESA (Computer Engineering Student Association)
